

10+ miles above earth surface ,depth not known, little to no air. No stars observed here by balloon/craft pics throughout history, just blackness and fixed sun. Dark gases regularly fluxuate,lense and reflect sun light to create illusion of stars and planets including moon and false sun movement.

Fixed Sun,
not to size,
see other
diagram 2

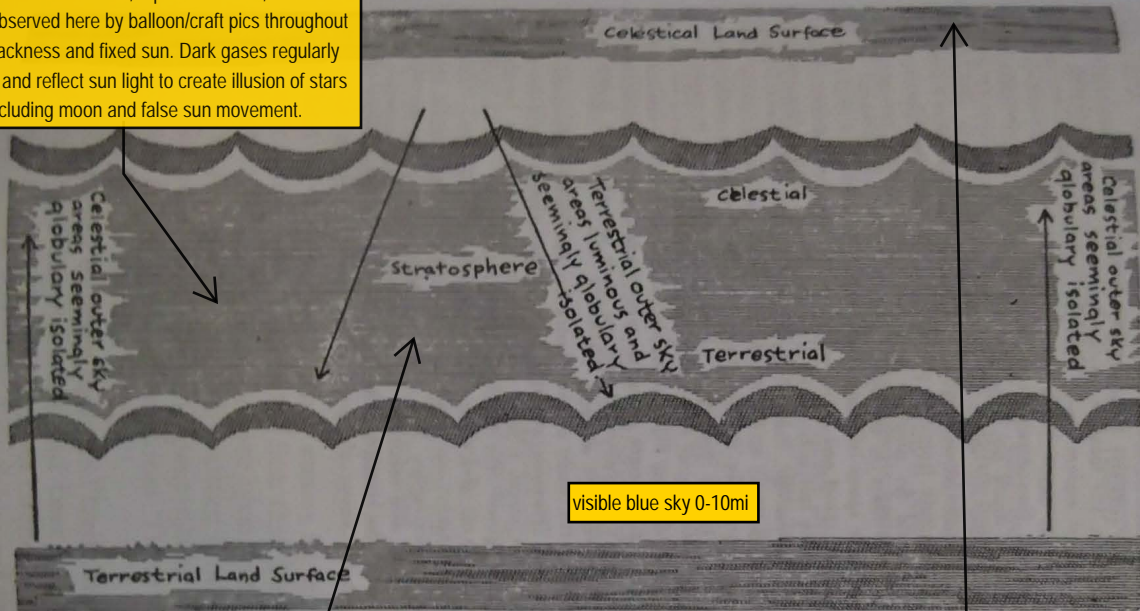

Figure 3
THE INFINITE SKY ENVELOPING THE UNIVERSE,
SHOWING THE INESCAPABLE ILLUSIONS

This is not intended to show distance from the terrestrial to the celestial; it cannot be drawn to scale. But it does indicate what the

nightly view of our terrestrial sky must be for our celestial co-
Our luminous outer sky, deceptively appearing as millions of
and isolated "bodies," would present to the Martian and
inhabitants of the Universe the identical so-called "Heaven"
which we see as their luminous and deceptively isolated s

"stars" and "planets" seen here but really just distorted reflections of Sun by gases and due to lensing curve effect appear as round objects. Sun doesn't move and is projected. Moon is only the sun's reflection at a different angle. Solar/Lunar eclipses the same, must be some unknown dark object or further gas effects. Suns motion is just the regular sky gas fluctuating at different rates and is not really moving.

What we see as black space, but hidden by lack of light and empty space, land surface really. Can be traveled to by going past arbitrary poles. No "spaceships" needed!
